

# Fixed Price Engineering Solutions

**market-leading integrated service provider of bespoke project delivery solutions to the aviation and aerospace industries**

*Budget Control Risk Reduction Specialisation Minimised Downtime*

## **Bespoke support solutions; because specific questions require specific answers...**

At Resource Group we recognise that in today's world, operators, be they airline, business aviation or military, are looking for known, measurable maintenance costs.

This pursuit of a quality, reduced risk service is something that we have responded to with the provision of specialist teams of aviation professionals, working to pre-defined timescales, budgets and our ever-exacting quality standards.

Our in-house team of aircraft maintenance experts has many years of experience in the delivery of fixed price aircraft upgrade and retrofit modification packages. We are able to take drawings, an airworthiness directive or service bulletin direct from our clients; be they OEMs, MROs or Airlines, and design a practical, intelligent solution.

We hand-pick the best teams to suit specific requirements, project manage the logistics and ensure your aircraft is operational again with the very minimum disruption to service.

We recognise that an operator's MRO strategy will always be driven by quality, cost and time and with our fixed price offering we target all three. This allows clients to concentrate on their core competencies whilst our high quality, dedicated teams take care of the rest.

*"We have been working with Resource Group for over a decade now and we feel we've grown towards a partnership. Resource Group not only supplies us with Engineers...*

*...They are willing to step forward and organize situations, even if this means they will have to take a business risk."*

Major OEM

*"Resource's workmanship, honesty, integrity, as well as their professionalism has made them one of our preferred maintenance organisations. Their attention to detail is second to none."*

Major Aircraft OEM, Customer Support Department

*Resource Group are a leading provider of manpower and associated services exclusively to the aviation & aerospace sectors.*

*Resource Group have been excelling in the supply of manpower, engineering solutions and technical training for the last 20 years.*

*Today, Resource Group has over 140 employees spread across five European locations and oversees in excess of 1100 people on contracts across the globe.*

# Fixed Price Engineering Solutions

**market-leading integrated service provider of bespoke project delivery solutions  
to the aviation and aerospace industries**

*MRO*

*Airlines*

*OEM*

*Military*

## A complete package; managed by us...

### **Solution Design**

Creating innovative, efficient solutions tailored to client needs. Our flexible solutions can be structured around set budgets and deadlines.

### **Technical Personnel**

Our 'team players' have a proven track record of excellence and we accept nothing less. This quality standard translates directly to our service delivery.

### **Project Management**

Our experience in complex project management means that work packages are completed to budget and on time, safely.

### **Logistical Organisation**

We simplify operational challenges by micro-managing the logistics. This means that we can be flexible and proactive and also saves our customer valuable time.

### **Training**

Any project specific training required can be delivered through Lufthansa Resource Technical Training; our own EASA Part 147 Approved training school.

### **24 hour Backup Service**

We're available day and night to support ongoing project requirements. If our clients are working, we're working.

## ...to benefit you.

### **Budgeting and Cost Control**

Transparent costs from the outset enable customers to budget for both time and cost with absolute accuracy.

### **Minimised Aircraft Downtime**

Operating on a closely monitored critical path from day one means that realistic project objectives are accomplished by a pre-defined time and date.

### **Financial Risk is Reduced**

Our fixed price solutions reduce the burden of financial risk to the client.

### **Our Practical Experience**

Use our experience and specialisation to your advantage. Wherever possible we'll use our knowledge of working procedures to assist customers in becoming even more time and cost efficient.

### **Typical projects include:**

*Embodiment of airworthiness directives and service bulletins*

*Winglet retrofits*

*EGPWS, TCAS and other avionics upgrades*

*Floor beam, engine beam, wing spar or seat track replacement*

*Non-conformity repairs*

*Extended range fuel tanks*

*A B & C checks*

*Aircraft audit teams for delivery or re-delivery*

*SFAR 88 related fuel tank modifications*

*PAX to cargo conversion*
